**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is unclear if applicant intended to claim a combination including a steering table and pedestal guard since a table is claimed with specific interconnection with a pedestal guard such pedestal guard not being positively claimed making the metes and bounds of the claims unclear and confusing to a potential infringer. Clarification and correction are required. Claim(s) 1 and 13 fail(s) to recite sufficient structural elements and interconnection of the elements to positively position and define the relationship of the slot and front edge so that an integral structure able to function as claimed is recited.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Meeus et al.

The patent to Meeus et al teaches structure as claimed including a top member (4)

Art Unit: 3637

having a slot (7), a bottom member coupled to the top member, the bottom member having a front edge for abutting a structure.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 3, 4, 11, 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Meeus et al. The patent to Meeus et al teaches structure substantially as claimed, as discussed above, including a slot and aperture, the only difference being that the aperture is located in the bottom member and not the top and there is an additional slot member. However, the use of a multiplicity of structures to perform the same intended purpose and the location of such structure would have been obvious and well within the level of ordinary skill in the art since such is used in the same intended purpose thereby providing structure as claimed.

***Allowable Subject Matter***

Claims 13-16 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Claims 2, 5-10 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Bowman, Matesic, Hoch, Gawronski, Brickman, Mayhew et al, Chen, Raasch, Jacovelli teach structure similar to applicant's.
